

AMENDMENT TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings of claims in the application:

Listing of Claims:

1 - 26 (cancelled)

27. (new) An outer decorative cover for attachment to a wireless communication device including a printed circuit board and an associated light source mounted in an interior of the wireless device, the outer decorative cover comprising:

an inner and outer surface; and

an optical fiber incorporated in a pattern with the outer decorative cover including an input end for receiving light from the light source when the light source is activated and the outer decorative cover is attached to the wireless communication device and a side surface which transmits the light therethrough along a length of the fiber when the light is received by the input end so as to cause the light transmitted along the length of the fiber to be visible when viewing the outer surface.

28. (new) An outer decorative cover for attachment to a wireless communication device including a printed circuit board and an associated light source mounted in an interior of the wireless device, the outer decorative cover comprising:

an inner and outer surface; and

an optical fiber molded in a pattern with the outer decorative cover including an input end for receiving light from the light source when the light source is activated and the outer decorative cover is attached to the wireless communication device and a side surface which transmits the light therethrough along a length of the fiber when the light is received by the input end so as to cause the light transmitted

along the length of the fiber to be visible when viewing the outer surface.

30. (new) An outer decorative cover as claimed in claim 27, wherein the optical member is embedded in the outer decorative cover.

31. (new) An outer decorative cover as claimed in claim 27, wherein the optical fiber is adhered to the inner surface of the outer decorative cover.

32. (new) An outer decorative cover as claimed in claim 27, wherein the optical fiber is adhered to the outer surface of the outer decorative cover.

33. (new) An outer decorative cover as claimed in claim 28, wherein the optical fiber comprises an optical fiber thread.

34. (new) An outer decorative cover as claimed in claim 28, wherein the optical fiber comprises an optical fiber panel.

35. (new) An outer decorative cover as claimed in claim 28, wherein the light source comprises a plurality of light emitting devices, each light emitting device being adapted to emit light of a different color, and the optical fiber comprises a plurality of optical fiber threads, the input end of each thread being adjacent a respective one of the light emitting devices so that each thread transmits light of a different color.

36. (new) An outer decorative cover as claimed in claim 28, wherein the light source comprises a plurality of light emitting devices, each light emitting device being adapted to emit light of a different color, and the optical fiber comprises a plurality of optical fiber panel portions, the input ends of each panel portion being adjacent a respective one of the light emitting devices so that each panel portion transmits light of

a different color.

37. (new) An outer decorative cover as claimed in claim 28, wherein the light source comprises a light emitting diode.

38. (new) An outer decorative cover as claimed in claim 27, wherein the light source is positioned on the outer decorative cover.
